# INDEX TO VOLUME 38

## ARTICLES

Alden H. Struble, 409.

Annual Review of Research in Science Teaching, An, Kenneth E. Anderson, 6–8.

Antoine Lavoisier and the Process of Cultural Evolution, Chester A. Lawson, 276–279.

Applying Biological Principles to Physical Science, Nathan S. Washton, 136–139.

Are Science Judgments Fair?, Robert D. MacCurdy and Thomas L. Bagshaw, 224–231.

Bibliography with Annotations of College Science in General Education 1951–1953, Vaden W. Miles, 336–390.

Biological Science in the General Education Program at Iowa State Teachers College, Leonard Philip Winier, 38–39.

Changes in Position by NARST Members, 410.

Conceptualization as a Function of Differential Reenforcement, Finley Carpenter, 284–294.

Cooperative Approach Toward Evaluation of Science in General Education at the College Level, A, W. C. Van Deventer, 129–136.

Development of a Course in Physical Science for High School Students Based on Their Expressed Interests in Science Topics, Steven J. Mark, 169–171.

Development of a Science Program in Teacher Education at Madison College, The, Murl W. Shawver, 307–311.

Development of an Introductory Biology Course for Gannon College, Joseph Zipper, 39–40.

Discussion of the Problem of Meeting Common Course Requirements by Examinations, A, Harley F. Glidden and Lois B. Lindbloom, 211–216.

Dr. Ellsworth S. Obourn, 189–190.

E. Laurence Palmer, 127–129.

Education of High School Science Teachers at Madison College, The, Percy H. Warren, 164–166.

Educational Significance of Studies on the Relation Between Rigidity and Problem-Solving, Finley Carpenter, 295–298.

Evaluation of Critical Thinking, Gordon M. Dunning, 191–211.

Experiment in Using Current Scientific Articles in Classroom Teaching, An, John M. Mason and Willard G. Warrington, 299–304.

Extending Research in Teaching Science, Samuel Ralph Powers, 5–6.

Factors of Effectiveness in Science Teaching and Their Applications to the Teaching of Science in Ohio's Public Secondary Schools, Warren Maywood Davis, 150–159.

Financial Report of NARST, Clarence M. Pruitt, 180.

George Greisen Mallinson, 125–127.

Henry Adams and the Process of Cultural Evolution, Chester A. Lawson, 279–284.

Inheritance as a Factor Influencing Achievement in Science and Other Academic Areas, Kenneth E. Anderson and Herbert A. Smith, 406–409.

Institute for the Teaching of Chemistry, The, 188, 231.

Joseph Priestly and the Process of Cultural Evolution, Chester A. Lawson, 267–276.

Laboratory Program for a General Education Course in the Physical Sciences, A, Anton Postl, 304–307.

Official Minutes of NARST, Clarence M. Pruitt, 177–180.

Preparing the Design for Science Education Research, Ellsworth S. Obourn, 398–404.

Process of Cultural Evolution, The, Chester A. Lawson, 279–284.

Reading Clinic, 332.

Report to the NARST on the Activities for 1952–53 of the Cooperative Committee on the Teaching of Science and Mathematics of the AAAS, George Greisen Mallinson, 171–175.

Resignations from Membership in NARST, 180.

Science Education Research Studies, Philip G. Johnson, 8–38.

Science Courses in Higher Education: A Select List of References, Walter Allen and M. H. Perkins, 40–58.

Science Workshop, 445.

Search for Science Talent, The, Samuel W. Bloom, 232–236.

Second Annual Review of Research in Science Teaching, Kenneth E. Anderson, Herbert A. Smith, Nathan S. Washton, and George W. Haupt, 333–365.

Some Implications and Practical Applications of Recent Research in the Teaching of Science at the Secondary-School Level, George Greisen Mallinson and Jacqueline V. Buck, 58–81.

Some Implications of Recent Research in the Teaching of Science at the Elementary-School Level, Jacqueline V. Buck and George Greisen Mallinson, 81–101.

Southeastern Work Conference on Biology Teaching, The, 404–406.

Statistical Approach to Problems in Science Education, The, Kenneth E. Anderson, 390–397.

Study of Certain Factors Involved in Conservation Education, A, Gilbert Banner, 166–168.

Study of Opinions Related to the Nature of Science and Its Purpose in Society, A, Leland L. Wilson, 159–164.

Synthesis and Evaluation of Objectives for a Course in College Biology, A, Mary Alice Burmester and Victor H. Noll, 143–150.

Test Items and Curriculum Background as Factors Which Influence Results in Evaluating Learning in High School General Science, William B. Reiner, 139–142.
Working with Gifted Science Students in Secondary Schools, Paul Klinge, 217–224.
